

Get the 'IT' Factor

Superior IT Solutions (formerly known as Superior Computers) pulls the pieces together to turn your technology investment into a secure, productive, integrated business solution.

A Superior record of service

Lasting commitment to professional service has established Superior as the IT solutions leader in the London and surrounding area.

EXPERIENCED

Superior has been a go-to source for complete computer sales and network services for more than 30 years.

TRUSTED

Hundreds of satisfied customers have put their trust in Superior for dependable solutions and expert support.

FOCUSED

We built our business by meeting the technology needs of small and medium-sized businesses, and they continue to be the focus of our services and plans for growth.

LOCAL

Superior has always been a London-based, London-owned business, rooted in our personal understanding of the business needs of our community.

RESPONSIVE

Years of meeting unique customer needs has allowed Superior's certified technical team to expand its knowledge-base in collaboration with a proven network of technology specialists.

IT Solutions Backed By Superior Service

For more than 30 years, Superior has been a leading name in IT services to businesses in the city of London and its surrounding region.

In 2019, we launched a new technical facility and dispatch centre, equipped to better support our field services teams throughout London and region. Our new location provides our teams with the bench tools and resources they need to deliver today's best in onsite IT service.

With a complete range of name-brand networking devices and components, supported by factory-authorized technicians and consultants, Superior is the 'IT' factor for your business!

Managing IT for your business

SUPERIOR SOLUTIONS

New network solutions

Superior consulting services can help you plan and develop your IT infrastructure to support your business goals. Our review will identify where you are, what your opportunities are, how best to get there, what the risks might be, and what results to expect.

Our IT procurement service opens the door to replacing IT systems that don't comply with Industry standards, with technology that protects your business from current and emerging security threats. We are the one-stop solution for:

- IT Consulting
- System Procurement
- Installation, Deployment and Monitoring

Upgrade & expand

To keep pace with continuous software advances, upgrading your servers and workstations is key to maintaining a stable network. Superior is your source for equipping your network with industry-leading products from Dell, HP, Lenovo, and more.

Cloud solutions from Superior provide predictable, subscription-based models that can vastly reduce the impact of infrastructure update disruptions while scaling its footprint, up or down. Let us help you move forward with the right configuration of:

- New servers & workstations
- LAN, remote and cloud solutions
- Windows & Office updates

Network security

Superior supplies today's best-in-class security products to keep your network protected from ever-evolving viruses and malware. We can recommend a layered approach to network defense by using a combination of security appliances, real-time software solutions and backup systems. Our backup products provide local and cloud-based bare-metal restore services to preserve your data and business from cyber attacks as well as premature system failures.

Give your IT the best defense with:

- Anti-malware
- Backup solutions
- Data recovery

Continuous maintenance

Your IT system works best when all its devices are at their best. Minimize the risk of security threats, data loss and performance degradation with a planned program of cleaning and software updates. Superior offers Preventive Maintenance Programs and Sentinel Managed Services to deliver real-time monitoring and patch management tailored to keep lost productivity at bay. We'll customize a service to include:

- Real-time monitoring of systems and backups
- Software updates and security patches
- Device clean-up and optimization

Desktop support

Upgrading your operating systems and new versions of Microsoft Office may also require upgrading the user experience too. Through remote support or onsite help, our experienced technicians can help your team to take advantage of new functionality and restore their comfort with their desktop IT. Count on Superior for:

- MS Office support
- Network orientation

Troubleshooting and repairs

Superior's team of certified, factory-authorized technicians has the experience and training to effectively troubleshoot and resolve a full range of network-related problems including:

- Hardware failures
- Software conflicts
- Connectivity issues
